Executive Summary

₹879 Billion FY25

Indian courier, express, and parcel (CEP) market

CAGR = 10%

Market Share = 20-22%

10% CAGR driven by D2C, resale, migration, social commerce

DELHIVERY ALREADY POWERS ~20-22% OF THIS ECOSYSTEM FROM THE BACKEND

Delhivery is extending from a B2B logistics backbone to a consumer & prosumer shipping layer

COMPETITOR ANALYSIS

PLATFORM	PRIMARY FOCUS	KEY STRENGTHS	KEY LIMITATIONS (RELATIVE TO DELHIVERY VISION)
FedEx	International shipping	- Strong cross border network - Scheduled pickup	- International first, weak domestic C2C focus - Basic tracking only (no verification) - Premium pricing, low affordability
My DTDC	Domestic C2C	- Scheduled pickup - Multi-parcel → single delivery 15+ product categories	₹100 pickup fee creates friction - Limited tech & transparency
Shiprocket	Small businesses	- Seller-focused tooling - Free trial onboarding	- Not consumer first - Setup fee dependency - Relies on partners (incl. Delhivery) for execution
Borzo	Hyperlocal / intracity	<20 min pickup	- Limited to major cities - Not intercity / national

➤➤ CORE CHALLENGE: “HOW CAN DELHIVERY UNLOCK CONSUMER SHIPPING WITHOUT BREAKING SERVICE QUALITY OR UNIT ECONOMICS?” ⬅️⬅️

PRINCIPLES FOR SUSTAINABLE SCALE

Building a repeat base of high-quality senders

Anchoring growth around dense, predictable demand pockets

Making trust system-driven, not people-dependent

Scaling only after unit economics + service reliability are proven

“Who We Win First: FPDR-Led Customer Prioritization”

The Solvoholics

THE FRAMEWORK: FPDR SEGMENTATION

CUSTOMER SEGMENT		FREQUENCY(F)	PREDICTABILITY (P)	PICKUP DENSITY (D)	RISK PROFILE (R)	ACQUIVISATION PLAN
	HOMEPRENEURS / SOCIAL SELLERS (INSTAGRAM, WHATSAPP, D2C MICRO-SELLERS)	HIGH (Weekly / daily batches)	MEDIUM-HIGH (Order-driven, repeat SKUs)	MEDIUM-HIGH (Residential clusters)	MEDIUM (Fragile, returns risk)	PRIMARY ENTRY SEGMENT • Priority onboarding • Subscription plans
	STUDENTS & MIGRANT PROFESSIONALS (HOSTELS, PGS, CO-LIVING SPACES)	MEDIUM (Seasonal / event-based)	MEDIUM (Weekly / daily batches)	VERY HIGH (Hostels, PG clusters)	LOW-MEDIUM (Personal items)	SECONDARY SCALE SEGMENT • Campus partnerships • Bulk pickup days
	C2C MARKETPLACE SELLERS (OLX, FACEBOOK MARKETPLACE USERS)	LOW (One-time / ad-hoc)	LOW (Unpredictable)	LOW (Scattered households)	HIGH (Scams, disputes)	CONTROLLED SCALE SEGMENT • Platform integrations • Mandatory verification • Insurance & proof layers

Differentiation

FROM CONSUMER RISK TO DELHIVERY ADVANTAGE

KEY CONSUMER RISK (PAIN POINT)	HOW DELHIVERY SOLVES IT (DIFFERENTIATOR)
Lack of Trust & Payment Security	• Integrated escrow with marketplaces / wallets • Payment released only after verified delivery (OTP + photo) • Dispute window with automated arbitration
Weak Proof & Slow Dispute Resolution	• Mandatory photo + GPS proof chain • Rules-based auto-refunds • In-app & WhatsApp fast resolution
High Risk of Damage Due to Poor Packaging	• Doorstep professional packing by certified agents • Standardized packaging kits & SOPs • Photo-verified packing process • Hub-based fallback packaging

DELHIVERY'S STRATEGIC DIFFERENTIATION ENGINES

 AI-First Customer Experience (DAAKIYA AI) • Dedicated AI chatbot for order specific assistance • Handles: Shipment status Next-step guidance	 Packaging-as-a-Core-Service • Competitors assume "user packs the parcel." • Delhivery handles standardized, damage-optimized packaging lower loss rates	 True National Coverage • Unlike Borzo (city-limited) and FedEx (international-heavy), Delhivery operates at pan-India scale for C2C and SMBs.	 Prevention Led Trust Mode • Photo-based condition matching (booking → pickup → delivery) • Evidence-backed claims • Others rely on post-failure refunds or manual dispute resolution.	 Predictable, AI Led Pricing • AI volumetric price estimator with price capping (standard RGB/LiDAR smartphones give 75-90% efficiency) • No arbitrary pickup fees (vs My DTDC's ₹100)	 Enterprise-Grade Tracking for Consumers • Live tracking at critical stages, not just scan updates • Real-time notifications with recognizable alerts	 Asset-First Execution • Unlike Shiprocket (aggregator model), Delhivery owns: Network Routes Workforce • Results in higher reliability and SLA control.	 Post-Delivery Experience as a Feature • Dedicated post-delivery resolution layer • Faster claim eligibility decisions

End-to-End Consumer Journey

SENDER (SHIPPER) EXPERIENCE: MVP → SCALE

KEY EXPERIENCE & FEATURES

BOOKING

- One-screen booking with auto-fill (marketplace /manual)
- AI price estimate with tolerance band
- Packaging & insurance option
- Clear SLA & ETA

PICKUP

- Verified agent arrival (photo + OTP)
- Doorstep professional packing
- Pickup photo + GPS proof
- Instant booking confirmation

TRANSIT

- Milestone-based tracking (hub scan, dispatch)
- Predictive delay alerts
- Secure handling for insured / fragile items

DELIVERY

- OTP + photo + GPS verification
- Escrow-linked delivery confirmation
- Real-time status update

POST-DELIVERY

- Auto-payment release
- Claims eligibility check
- In-app/WhatsApp support
- Shipment history & invoice

RECEIVER JOURNEY (C2C RECIPIENT EXPERIENCE)

KEY EXPERIENCE & FEATURES

BOOKING

- Pre-delivery notification
- Shipment preview (item, sender, ETA)
- Address & slot confirmation

PICKUP

- Real-time pickup status
- Packaging confirmation photos
- Expected delivery window

TRANSIT

- Clean tracking (Pickup → Out for Delivery → Delivered)
- Predictive delay alerts
- Slot rescheduling

DELIVERY

- OTP/QR verification
- Delivery photo + GPS stamp
- Secure handover

POST-DELIVERY

- One-tap damage/missing report
- Auto-refund eligibility
- Feedback & rating

HOW WE WOULD BUILD THE APP!

Customer Prioritization

Differentiation

Consumer Journey

Delhivery Direct V2

Execution Roadmap

Marketing & Branding

Strategic Partnerships

Consumer Interface

- Simple booking & pickup flow
- Slot-based pickup scheduling

Trust & Proof Layer

- Photo proof at pickup & delivery
- OTP/QR verification
- Immutable scan & GPS trail
- Embedded micro-insurance

Pricing & Decision Engine

- AI-led volumetric estimation
- Rules-based pricing tolerance
- Auto-claims eligibility logic

Logistics Backbone

- Existing hubs, sort centers, linehaul
- Route optimization & capacity planning
- Bundled consumer + B2B flows

Support Flow

Customer raises claim in app

System auto verifies via photo comparison of final and initial condition of the package

Instant eligibility decision

Fast refund / resolution

Success Metrics (What We Track Weekly)

- Activation rate (first pickup <7 days)
- Repeat shipments (30 / 90 days)
- Claims per 1,000 shipments
- Pickup density per route
- Contribution margin per shipment
- CAC vs LTV by segment

PROBABLE RISKS

MITIGATIONS

Ops overload

FPDR demand filtering

Price disputes

AI volumetric bands

Trust failures

Proof-first design

Execution Roadmap

PHASE 1 PILOT (TRUST VALIDATION PHASE)

 **Timeline:** (3–4 Months)

Geography:

- 2–3 Metro Cities (e.g., Delhi NCR, Bengaluru, Mumbai)
- Only dense pockets near hubs:
 - Colleges & hostels
 - PG / co-living clusters
 - Seller apartments
 - Used-goods hotspots

Company-Level Focus:

- Creating Dedicated Pilot Task Force
- (Ops + CX + Tech + BD)
- Locking serviceability maps for pilot pincodes
- Enforcing packaging & proof SOPs strictly
- Setting up daily escalation channel

PHASE 2 CLUSTER EXPANSION

 **Timeline:** (6–10 Months)

Geography: City Clusters

- Entire city zones around pilot hubs
- Secondary dense cities (Pune, Indore, Jaipur, Coimbatore)
- Industrial-residential mixed zones

Customer Focus:

- Repeat sellers
- Micro-entrepreneurs
- Facebook / Instagram commerce groups

Company-Level Focus:

- Institutionalizing pilot learnings
- Launching subscription programs

Acquisition Approach

- Referral program
- Merchant onboarding drives
- In-app retention nudges
- Co-branded partner launches

PHASE 3 NATIONAL SCALE (PLATFORMIZATION)

 **Timeline:** (10–30 Months)

Geography: National Footprint

- Tier-2/3 cities
- Marketplace-heavy regions

Customer Focus:

- Nationwide sellers
- Institutions
- Platform partners
- Subscription users

Company-Level Focus:

- Launching partner APIs
- Deploying AI routing nationally
- Building fraud command center
- Centralizing pricing engine

Acquisition Approach

- Selective ATL
- Platform partnerships
- Fintech bundling
- Loyalty ecosystems

Marketing & Branding

CORE MARKETING STRATEGY:
 REDUCE PERCEIVED SHIPPING RISK TO NEAR-ZERO BEFORE FIRST USE BY SHOWCASING PROOF, PROCESS, AND PROTECTION

Customer Prioritization

Differentiation

Consumer Journey

Delhivery Direct V2

Execution Roadmap

Marketing & Branding

Strategic Partnerships

ATL STRATEGY

- Role:** Normalizing the idea that courier booking can happen from home
- Focusing on process visibility
- Showing process visibility:**
 - Pickup happening at doorstep
 - Packing happening in front of user
 - Photos being taken
 - Tracking updates

CHANNELS

- YouTube & Instagram video ads
- Metro + Tier-2 OOH near colleges & residential hubs
- OTT (regional + national)

BTL STRATEGY

- Role:** Trust Activation & First-Use Conversion Engine
 - Hostels, PGs, colleges (semester end)
 - Local seller hubs
 - Apartment complexes

"FIRST SHIPMENT SAFETY NET"

(Not a discount but a risk free guarantee)

- First shipment:
- Free pickup
- Free packaging
- Free insurance up to a cap
- In-app / platform partnerships (OLX listings → "Ship with Delhivery")

MARKETING INITIATIVES

ATL- "DELHIVERY WALE BHAIIYA" campaign (Modern-Day Dakiya)

- ADS focusing on "Courier?? Delhivery wale bhaiya ko bulao!" for every logistics need.
- Social media Campaigns

With 'Delhivery wale bhaiya', we turn a complex logistics network into a trusted human presence, making doorstep shipping intuitive, emotional, and unforgettable for Indian consumers.

EVENT-TRIGGERED CAMPAIGNS

Key Triggers

- Semester ends
- Festivals
- Relocations
- Online resales

Campaign Examples

- "Semester End Shipping Week"
- "Festival Packing at Home"
- "Sold online? Ship instantly"

PLATFORM-LED GROWTH

- Marketplaces & Resale Platforms OLX / Quikr / Facebook Marketplace
- ONDC
- Rental & Recommerce Apps (Rentomojo, Cashify)
- Financial & Merchant Apps Paytm / PhonePe / Razorpay / BharatPe

COMMUNITY-LED GROWTH

- WhatsApp Seller Communities
- College Clubs
- Creator & Influencer Networks

Strategic Partnerships

STRATEGIC PARTNERSHIPS

WHAT	WHY	HOW
MULTI-MODAL LOGISTICS PARKS (MMLPS)	• Enable intermodal freight (road + rail) for consumer and C2C parcels • Provide access to packaging spaces for our “Packaging” feature and mechanized warehousing	• Act as anchor tenant / O&M partner inside priority MMLPs • Deploy automated sortation and cartonization
C2C MARKETPLACE PLATFORMS (OLX, QUIKR)	• Already existing customers align with our target customersBiggest friction for them: lack of safe and verifiable delivery	• “Ship with Delhivery” CTA directly on listings • Auto-populate shipment details from product listings
EMBEDDED INSURANCE PARTNERS	• Fear of damage is a major psychological adoption blocker	• API-based insurance integration per shipment • Photo-based pickup and delivery proof for faster claim validation

Synergies Within the Organization

What Delhivery already has	How the App uses it	Area of Synergy	How Synergy Works	Business Impact
• Already scaled B2B system, sorting centers, hubs, line-haul lanes • Thousands of trained delivery executives • Route optimization algorithms • Scan, track, and sort systems	• Doorstep pickup • Bundle C2C pickups into existing B2B routes. • Rebrand first-mile pickup agents as “Delhivery Wale Bhaiya” • Same workforce, new consumer-facing identity	OPERATIONS & NETWORK	• Use existing hubs, routes, and vehicles for consumer parcels	Reduces cost per delivery and improves speed
		TECHNOLOGY PLATFORM	• hare tracking, routing, and scanning systems	Better visibility and accurate delivery updates
		FIELD STAFF & PICKUP AGENTS	• Train existing agents for consumer pickups and packaging	Improves service quality and reduces damage
